

LAZER TECH

TECH CALLS

When calling for set-up and tech info be sure to call the 717-865-6691 number which is our tech line. We prefer to use this line so we don't tie up our order lines. Also feel free to e-mail any tech questions to Jim at jbernheisel@comcast.net. Finally on Friday and Saturday nights you can reach Jim or Brandon on the race day cell phone @ 717-926-1674 Please be patient, it's noisy and busy at the race track for us just as it is for you. We will get back to you just as soon as we can. Nobody gives the level of service that B.R.C. does... nobody!

4-LINK ADAPTERS

Lazer now offers a bolt-on 4-link adapter bracket. A right lower bracket decreases roll steer and is fantastic on a slippery race track. A left upper bracket increases anti-squat and can help improve traction issues. Both are brackets come powder coated silver and work with your existing aluminum spacers. They require a 1 1/2" shorter radius rod. R.T. Lower # 8410, L.T. Upper # 8411 both racer at \$ 79.64

SHOCK BAGS

We have seen a huge increase in shock failure due to nicked & rough shafts. Unfortunately many tracks have rocky, abrasive surfaces. This condition can easily cause shaft damage which leads to premature shock failure. An easy way to prevent this problem is with a protective cover called a shock bag. We have three different flavors... Afco- Blue, Genesis- Gray, and Integra -Black.

SET-UP STICKS

To facilitate working on your car when you have no springs & shocks mounted up, we have come up with official Lazer Ride Height Sticks. They have adjustable rod ends for zero bind. They are great for aligning your front end, squaring you rear, ect...A complete set is part # 8415 and sells for \$ 99.95

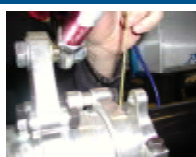

BALL JOINT CHECKER

In our last issue we mentioned how important it is to maintain proper front suspension geometry, by checking for bent ball joints. We now offer ball joint check tools, they are easy to use. Lower checker #22500 and Upper checker #22502 sell for \$ 11.20 each.

SHOCK DROP

On the lazer Late Model Chassis we control how far the chassis climbs the left rear 4-bars with the length & mounting position of the left rear front shock. In the past we gave you a specific mount location and shock extension instructions. Because of different brands of shocks have greatly varying lengths we are recommending a new procedure, Simply jack up the rear of the chassis and let the rear end droop. Measure from the left rear ride height tab to the bird-cage. It should be 13 3/4 to 14 1/4 inches. To adjust move the bracket up or down the bird-cage. An adjustable swivel bracket makes this job much easier. It is part# 3750 and costs \$ 66.00

LAZER TECH

To Our Valued Customers,

In an effort to improve our communication with you and thus improve your racing program we will periodically provide tech bulletins. These bulletins should address some of your most frequently asked questions.

As always you are welcome to call our tech-line @ 717-865-6691 or e-mail us at lazerchassis@comcast.net

Thank You and Good Luck!

- Jim Bernheisel -

NEW FOR 2009 !!

We want to produce a Lazer highlights DVD and we need your help. As the season goes on please send us video clips and still shots of you and your car winning or in victory lane. Everyone who sends us a victory photo will be entered into our year end drawing. Each time you win send a new DVD/ photo you get another entry. Every victory lane interview that mentions Lazer or BRC gets an extra entry.

Example: If you win 3 races and send us videos and in 2 of them you mention Lazer or BRC during the interview you get 5 entries in the grand prize drawing.

Bonus entries: Visible Lazer decals on car, Lazer Uniform in victory lane.

Please mark all entries with the following information. Date, Track, Driver, Owner.

Grand Prize \$ 500 gift certificate, 2nd place \$ 200 gift certificate, 3rd place \$ 100 gift certificate,

4th place \$ 50 gift certificate, 5th place \$ 25 gift certificate, All entrants will receive a free finished DVD.

Help us make this a fun way to promote Lazer as well as you and your race team.
